Biotechnology Regulatory Services

Last Modified:

Biotechnology Regulatory Services helps American agriculture stay at the forefront of science and innovation. From row crops that better tolerate environmental stresses to vegetable and oil crops that produce healthier foods, people develop new products every day using genetic engineering. We work alongside other Federal agencies to make sure these products are safe for U.S. agriculture and the environment.

[About Us](#)

Priorities

[Permits and Notifications](#)

We regulate the importation, interstate movement, or environmental release of certain organisms developed using genetic engineering that may pose a plant pest risk. Learn more about permitting requirements and our regulatory process.

[Visit Biotechnology Permits and Notifications](#)

[Petitions](#)

Developers may petition the agency that a particular regulated article is unlikely to pose a plant pest risk and, therefore, should no longer be regulated under 7 CFR

[Am I Regulated?](#)

Developers may submit an Am I Regulated inquiry to learn whether their modified organism is regulated under 7 CFR 240 (2019) before applying for an authorization

[Compliance and Inspections](#)

We have a comprehensive system to help ensure that biotechnology organizations are maintaining compliance with APHIS' biotechnology regulations.
