One Health

Last Modified:

One Health is a collaborative, multisectoral, and transdisciplinary approach — working at the local, regional, national, and global levels — with the goal of achieving optimal health outcomes recognizing the interconnection between people, animals, plants, and their shared environment. (U.S. Government Definition, established 2017)

To promote the adoption and use of this definition, USG One Health partners are working to highlight it on their public websites. Both sites already include similar language, so this is a minor change to harmonize it across partners. Examples include:

- CDC: https://www.cdc.gov/one-health/about/index.html
- DOI: https://www.doi.gov/emergency/one-health

Highlighted Partnerships

We partner with Federal agencies, States, Territories, Tribes, universities, organizations, and others—here at home and around the world—across multiple disciplines and sectors. Our goal is to find the best health outcomes for animals, plants, people, and their shared environment.

USDA One Health
National Association of State Departments of Agriculture
Centers for Disease Control and Prevention
U.S. Geological Survey
U.S. Environmental Protection Agency
U.S. Food and Drug Administration
American Veterinary Medical Association
World Organisation for Animal Health

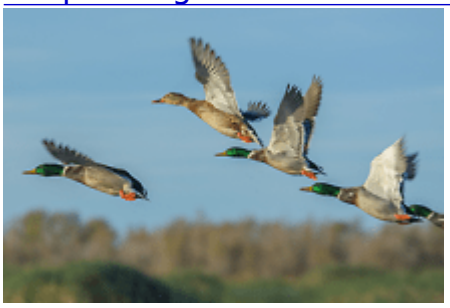

Priority Issues

Protecting animal and plant health intersects with some of the most pressing issues of our time: diseases that can spread between animals and people, global population growth, and food security. One Health is key in finding solutions. Learn how we're advancing One Health practice through research, applied science, and other initiatives.

Improving Food Safety From Farm to Fork

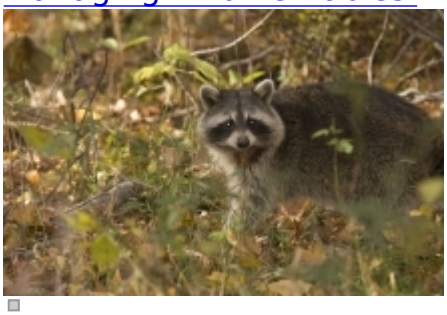

Responding to Avian Influenza

Understanding SARS-CoV-2 in Animals

Managing Wildlife Rabies

Farm-to-Fork Continuum: Improving Food Safety

APHIS collaborates with numerous Federal, State, and industry partners along the farm-to-fork continuum. Our goal is to improve food safety by reducing pathogen transmissions between animals and people.

Webinar Series

We host quarterly webinars on topics of interest to the farm-to-fork community. Watch the recording from our most recent webinar below.

Date	Presentation	Presenter
10/8/24	The Commensal vs. Control: *Salmonella* in Broilers	Dr. Ryan Arsenault, USDA Agricultural Research Service
