Veterinary Health Certificate for Export of Fattening (Feeder) Cattle from the United States of America to Indonesia

Veterinary Authority	Date Of Issue	Certificate Number
UNITED STATES DEPARTMENT OF AGRICULTURE		

Certification Statements:

I, the undersigned USDA Accredited Veterinarian, certify to the following statements:

1. The United States of America is officially recognized as a country with negligible BSE risk and complies with the conditions referred to in the Terrestrial Animal Health Code of the World Organization for Animal Health (WOAH).

2. The United States of America is officially recognized as free from Foot-and-Mouth Disease (FMD) without vaccination, Contagious Bovine Pleuropneumonia (CBPP) and Peste des Petits Ruminants (PPR) by the World Organization for Animal Health (WOAH).

3. The animals originated from a premises that has been free for at least twelve (12) months prior to shipment from clinical cases of the following diseases:

3.1. Actinomycosis;
3.2. Anaplasmosis;
3.3. Anthrax;
3.4. Aujeszky's disease;
3.5. Babesiosis;
3.6. Blackleg;
3.7. Bluetongue;
3.8. Botulism,
3.9. Bovine genital campylobacteriosis,
3.10. Bovine viral diarrhea/mucosal disease (BVD/MD) including persistent infections
3.11. Brucellosis;
3.12. Enzootic bovine leukosis (EBL).
3.13. Epizootic hemorrhagic disease;
3.14. Hemorrhagic septicemia;
3.15. Infectious bovine rhinotracheitis/infectious pustular vulvovaginitis (IBR/IPV)
3.16. Johne's disease;
3.17. Malignant catarrhal fever;
3.18. Malignant oedema;
3.19. Pulpy kidney;
3.20. Q-fever;
3.21. Tetanus;
3.22. Theileriosis;
3.23. Trichomoniasis;
3.24. Tuberculosis;

4. The cattle for export originate from states officially free of tuberculosis status OR the animals were test negative using intradermal tuberculin test.

5. The cattle for export originate from states officially free of brucellosis OR the animals were test negative using Buffer Brucella Antigen Test, or other test approved by APHIS, prior to export.

6. The cattle for export were treated with a systemic insecticide at least twice prior to export, at least 10-14 days apart, the most recent treatment being within 7 days prior to export.
