Veterinary Health Certificate for Export of Breeding Swine from the United States of America to Indonesia

Veterinary Authority	Date Of Issue	Certificate Number
UNITED STATES DEPARTMENT OF AGRICULTURE		

Certification Statements:

I, the undersigned USDA Accredited Veterinarian, certify to the following statements:

1. The United States of America is officially free from African swine fever (African hog cholera), classical swine fever (hog cholera), foot-and-mouth disease (FMD), porcine viral encephalomyelitis (Teschen disease), Swine Vesicular Disease (SVD), and Nipah Virus Encephalitis in accordance with the standards in the current WOAH Terrestrial Animal Health Code.

2. On the premises of origin, there have been no clinical signs of atrophic rhinitis, porcine brucellosis, porcine reproductive and respiratory syndrome (PRRS), pseudorabies (Aujeszky's disease), Porcine Epidemic Diarrhea (PED), Transmissible Gastroenteritis (TGE), Vesicular Stomatitis, trichinellosis, or tuberculosis for the last 12 months prior to shipment.

3. On the premises of origin, there have been no clinical signs or case reports of Postweaning Multisystemic Wasting Syndrome (PMWS), Porcine Dermatitis and Nephropathy Syndrome (PDNS), Swine Erysipelas, Swine Influenza, Porcine Parvovirus, and Progressive Atrophic Rhinitis present during the last 6 months prior to the shipment.

4. The pig(s) were kept since birth or for at least 6 (six) months prior to shipment in an establishment where no case of anthrax was officially reported during the period.

5. The animals for export have been vaccinated against Swine Erysipelas at least 14 days prior to shipment.

Date(s) of Vaccination: _____

6. The animals for export were treated against endoparasites, during the period of isolation.

Name of Product Used: _____
Date of Administration: _____

7. The animals for export were treated against ectoparasites, during the period of isolation.

Name of Product Used: _____
Date of Administration: _____

8. The animals were inspected by a USDA accredited veterinarian during isolation and found to be free of notifiable contagious disease.

9. During isolation, the pig(s) were either tested negative for leptospirosis as noted on the test chart below; OR were treated with a long-acting oxytetracycline at a rate

Certification Statements:

of 20 mg/kg body weight; OR were vaccinated.

10. The pig(s) intended for export have been kept in an isolation facility approved by the USDA-accredited veterinarian, for at least 30 days prior to shipment.

Date of Entry into Pre-Export Isolation: _____

11. The pig(s) intended for export were tested negative during the isolation period at a government approved laboratory, and the date of the test and the test results are included in this certificate, for the following tests:

a. PRRS - ELISA; OR PCR; OR IFA test.

b. Leptospirosis - Polymerase chain reaction (PCR); OR other approved test based on the WOAH Terrestrial Manual for Leptospirosis; OR were treated prophylactically using an approved antibiotic; OR were vaccinated.

c. Porcine Brucellosis – Complement fixation (CF) test; OR BBAT(RBT/BPAT); OR ELISA OR other approved test based on the WOAH Terrestrial Manual for swine brucellosis.

d. PMWS (porcine circovirus) - Polymerase chain reaction (PCR); OR the animals were vaccinated prior to export.
