Certification Statements :

1. The flocks of origin were inspected by a veterinarian within thirty (30) days preceding the date of importation.
2. To the best of the knowledge and belief of a veterinarian, the flocks of origin are free from communicable disease and have not been exposed to avian pneumoencephalitis (Newcastle Disease), fowl plague, fowl typhoid, pullorum disease and ornithosis.

Check the appropriate certification (Select one)

- ☐ 3a. The flock of origin which the poultry originated is found free from pullorum disease and fowl typhoid under the United States Department of Agriculture National Poultry Improvement Plan.
- ☐ 3b. Serological tests have been conducted on all poultry in the flock of origin from which the poultry originated within 12 months preceding importation and such tests proved negative for pullorum disease (*Salmonella pullorum*) and fowl typhoid (*Salmonella gallinarum*). The poultry originated from poultry resident in the flock of origin which existed at the time of the tests of the flock referred to herein or from poultry that were natural increases of that flock or additions which originated from a flock serologically negative to a test for pullorum disease (*Salmonella pullorum*) and fowl typhoid (*Salmonella gallinarum*) within 12 months prior to entry to the flock of origin.
4. The poultry are in new, clean containers, or in used containers that have been cleaned and disinfected for the purpose of preventing the introduction of diseases.
5. The flocks of origin of the poultry being presented for importation must have been either resident in the U.S.A. for at least sixty (60) days immediately prior to the date of exportation, or resident since birth or hatching.
6. Poultry covered by this certificate do not originate from flocks nor had contact with any birds or poultry originating in a control zone established by state/provincial/Federal animal health authorities due to outbreaks of Newcastle disease or Highly Pathogenic Avian Influenza (HPAI).
