According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control numbers for these information collections are 0579- 0020, 0036, 0048, 0101, 0156, 0278, and 0432. The times required to complete these information collections is estimated to average .25 to 1.5 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

OMB Approved
0579- 0020, 0036, 0048, 0101, 0156, 0278, and 0432

Veterinary Health Certificate for Export of
Small Ruminants (Sheep and Goat) Embryos from the United States of America to Indonesia

Veterinary Authority	Date Of Issue	Certificate Number
UNITED STATES DEPARTMENT OF AGRICULTURE		

Certification Statements:

I, the undersigned USDA Accredited Veterinarian, certify to the following statements:

1. The United States is officially recognized to have free from Foot-and-Mouth Disease (FMD) without vaccination.

2. The United States is free from Sheep and Goat Pox, Peste des Petits Ruminants (PPR), Contagious Caprine Pleuropneumonia (CCPP), and Rift Valley Fever.

3. The donor animals were born and raised in the United States or were legally imported and have been residents in the United States during the 60 (sixty) days prior to embryo collection.

4. The donor animals originate from premises officially free of Caprine/Ovine Brucellosis (Brucella melitensis) for the last 12 (twelve) months prior to collection of the embryos.

5. The donor animals originated from premises free of clinical cases of Scrapie, Maedi Visna, Caprine Arthritis/Encephalitis, Bluetongue, Ovine Epididymitis, Peste des Petits Ruminants, Contagious Caprine Pleuropneumonia, Contagious agalactia, and Tuberculosis for the last 12 (twelve) months prior to collection of the embryos.

6. The donor animals originated from premises free of clinical cases of Paratuberculosis (Johne’s disease) for the last 2 (two) years prior to collection of the embryos.

7. The donor animals were inspected on the day of embryo collection and found to be free from any clinical evidence of infectious or communicable disease, and were not exposed to infectious disease transmissible by embryos during the 60 (sixty) days preceding collection, to the best of my knowledge.

8. The Embryo Collection (EC) facility is approved by the USDA and is under the direct supervision of a USDA accredited veterinarian and meets the WOAH-TAHC Chapter 4.8, Chapter 4.9, and Chapter 4.10 or with applicable regulations and rules.

9. The embryos for export were collected and processed by the embryo collection or production team which is approved by the USDA and subjected to yearly inspection by USDA APHIS.

10. The collection, storage and transport of the embryos was carried out in accordance with procedures endorsed by the International Embryo Technology Society (IETS) and the WOAH TAHC Chapter 4.8.

11. Embryos were created using semen that meets with the WOAH-TAHC Chapter 4.6 and Chapter 4.7.

Small Ruminants (Sheep and Goat) Embryos from the United States of America to Indonesia

Veterinary Authority	Date Of Issue	Certificate Number
UNITED STATES DEPARTMENT OF AGRICULTURE		

Certification Statements:

12. All antibiotics added to media used to process or culture embryos in this consignment were added according to the recommendations of the IETS.

13. The embryos should be washed at least ten times with at least 100-fold dilutions between each wash in accordance with WOAH TAHC Chapter 4.8.

14. The zona pellucida of each embryo, after washing, should be examined over its entire surface area at not less than 50X magnification to ensure that it is intact and free of adherent material.

15. The embryos were packed in sterile ampoules, vials, or straws that are under strict hygienic conditions at a storage place approved and under the supervision of the USDA accredited veterinarian, where there is no risk of contamination of the embryos.

16. Ampoules/vials or straws are permanently marked in accordance with the IETS recommendations, and each ampoule/vial or straw contains only embryos from the same donor.

17. The donor animals were kept in a pre-entry isolation facility for at least 28 (twenty-eight) days under the supervision of the center accredited veterinarian prior to entering the Embryo Collection (EC) facility.

18. Donors were tested negative a minimum of 21 (twenty-one) days after entering the pre-entry isolation facility, for the following diseases:

a. Brucellosis, only if donor originates from a state not certified FREE of B. abortus, per APHIS.
b. Tuberculosis (for goats), only if donor originates from a state not accredited FREE of M. bovis, per APHIS.
c. Bluetongue (BTV)

19. Resident donors in the embryo collection facilities were tested negative at least annually for the following diseases:

a. Brucellosis, only if EC is located in a state not certified FREE of B. abortus, per APHIS.
b. Tuberculosis (Mycobacterium bovis) for goats, only if EC is located in a state not accredited FREE of M. bovis, per APHIS.
c. Bluetongue

20. Frozen embryos will be shipped in a new or cleaned and disinfected or container sterilized before use, with new liquid nitrogen under the supervision of a USDA accredited veterinarian.

21. The semen straws are individually identified with donor animals and identification of the embryo collection facility.
